VICTORY MADUMERE

Senior Frontend Developer | React, TypeScript, Next.js

Frontend-focused Software Engineer with 5+ years of experience developing scalable web applications, e-commerce platforms, and digital products using React, TypeScript, JavaScript, and Next.js. Strong background in frontend architecture, UX/UI engineering, reusable component systems, API integration, and performance optimization. Experienced in building responsive, accessible interfaces and supporting complex e-commerce workflows. Combines full-stack engineering expertise with a product-focused approach to delivering intuitive, maintainable, and high-performance digital experiences.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer at Etc GMBH Solutions, Berlin

SEPT 2024 – SEPT 2026

- Developed and maintained scalable web applications using React, TypeScript, Node.js, and Express.js, supporting over 1,500 active users.
- Led frontend architecture decisions and built reusable React component systems to improve maintainability, consistency, and development efficiency.
- Translated UX/UI designs and product requirements into responsive, accessible, production-ready interfaces.
- Integrated RESTful APIs and backend services to support dynamic, data-driven application features.
- Collaborated with UX/UI designers, product managers, and QA engineers to improve usability, application performance, and software delivery.

E- commerce Developer at L'Oréal, London

OCT 2022 – SEPT 2024

- Built responsive, conversion-focused e-commerce interfaces and reusable frontend components using React and TypeScript to improve development consistency across product lines.
- Implemented and maintained API integrations for product catalog, cart, and payment workflows, increasing checkout reliability and data accuracy.
- Authored unit and integration tests and participated in code reviews to raise code quality and reduce regressions.
- Collaborated with product managers and designers to deliver user-centered features and streamline release handoffs.

CORE SKILLS

Frontend Development: React, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3, Vue.js

UX/UI Engineering: Figma-to-Code Implementation, Design Systems, UI Component Libraries, Design-to-Development Handoff, User-Centered Design, Interactive Prototyping, Visual Consistency, Cross-Browser Compatibility

Digital Product Engineer at L'Oréal, London

FEB 2022 — OCT 2022

- Contributed to the development of web-based digital products and responsive user interfaces.
- Translated product requirements and UX/UI specifications into reusable frontend features.
- Supported API integrations, debugging, testing, and application improvements.
- Collaborated with cross-functional teams to deliver reliable and user-centered digital experiences

Full Stack Developer Intern at Tribal Tech, Manchester

JAN 2021 — JUN 2021

- Supported the development of frontend and backend application features using React, JavaScript, Node.js, and Express.js.
- Built interactive frontend components and administrative dashboards for data visualization and reporting.
- Assisted with REST API integration, debugging, and application testing.
- Participated in code reviews and collaborated with developers to improve application reliability.

EDUCATION

B.Sc. Computer Science at University of Birmingham, United Kingdom

MAR 2019 — SEPT 2021

SELECTED PROJECTS

E-Commerce Platform Development

- Developed a scalable React-based e-commerce application supporting over 2,000 daily transactions.
- Built responsive shopping interfaces and administrative dashboards for inventory, sales, and user management, focusing on usability and consistent UX/UI.
- Integrated Stripe and PayPal into secure checkout workflows, connecting frontend components with backend APIs and authentication services.

Real-Time Analytics Dashboard

- Developed a responsive, real-time analytics dashboard using React and Chart.js, transforming complex engagement and operational data into intuitive, interactive visualizations.
- Integrated WebSockets and backend APIs to deliver real-time data updates and dynamic dashboard functionality.
- Implemented role-based access control (RBAC), providing tailored dashboard experiences for administrators, analysts, and clients.

Customer Feedback & Sentiment System

- Integrated frontend components with Node.js APIs and backend sentiment-analysis services to deliver processed insights.
- Supported a platform processing 50,000+ reviews and reduced negative-feedback resolution time by 18% through improved triage and visibility.
- Developed React-based feedback forms and interactive admin dashboards, integrating Node.js APIs to present customer reviews and sentiment analysis insights.

Frontend Architecture: Component-Based Architecture, Reusable UI Components, React Hooks, Context API, Redux, State Management, Component Composition, Design System Implementation

E-commerce & Digital Products: E-commerce Development, Digital Shopping Experiences, Product & Inventory Interfaces, Checkout Workflows, Payment Integration, API Integration, User Experience Optimization

Testing & Quality: Jest, React Testing Library, Cypress, Playwright, Unit Testing, Integration Testing, Debugging, Code Reviews

Performance & Accessibility: Web Performance Optimization, Code Splitting, Lazy Loading, Responsive Design, WCAG 2.1 Accessibility

API Integration: REST APIs, GraphQL, WebSockets, Authentication & Authorization

Tools & Workflow: Git, GitHub, CI/CD, Agile/Scrum, Cross-functional Collaboration

Additional Technical Skills: Node.js, Express.js, SQL, MongoDB, AWS, Docker, Firebase
