VICTORY MADUMERE

Senior Frontend Developer | React, TypeScript, Next.js

Senior Frontend Developer with nearly 5 years of experience building scalable, high-performance web applications using React, TypeScript, Next.js, and modern JavaScript. Experienced in frontend architecture, UX/UI engineering, reusable component libraries, and translating Figma designs into accessible, responsive, production-ready interfaces. Delivered solutions supporting 1,500+ active users and platforms handling 50,000+ customer reviews, while contributing to a 25% reduction in page load times and a 15% improvement in delivery speed. Skilled in developing intuitive, user-centered experiences that combine technical excellence, visual consistency, and business objectives.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer at Etc GMBH Solutions, Berlin

SEPT 2024 – PRESENT

- Developed responsive, user-centric web application interfaces using React, TypeScript, and modern JavaScript, supporting 1,500+ active users.
- Translated UX/UI design specifications and product requirements into interactive, accessible, and reusable frontend components.
- Led frontend architecture decisions and developed scalable, reusable React and TypeScript component systems, establishing consistent UI patterns and improving application maintainability, performance, and development efficiency.
- Collaborated with UX/UI designers, product managers, and QA engineers to translate design specifications and business requirements into accessible, responsive, and production-ready interfaces.
- Drove UX/UI implementation in collaboration with designers, product managers, and QA engineers, translating product requirements into accessible, responsive interfaces while maintaining design consistency across application features.

Front-End Developer at Aero Interactive, London

JUN 2023 – MAR 2024

- Developed responsive, accessible, and visually consistent web interfaces using React, Vue.js, and modern JavaScript (ES6+), ensuring seamless experiences across desktop, tablet, and mobile devices.

CORE SKILLS

Frontend Development: React, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3, Vue.js

UX/UI Engineering: Figma-to-Code Implementation, Design Systems, UI Component Libraries, Design-to-Development Handoff, User-Centered Design, Interactive Prototyping, Visual Consistency, Cross-Browser Compatibility

- Built an interactive real-time analytics dashboard using React, Chart.js, and WebSockets, transforming complex datasets into intuitive visualizations and user-friendly interfaces.
- Optimized frontend rendering and application performance, reducing average page load times by 25% across core pages.
- Improved application accessibility in alignment with WCAG 2.1 standards, enhancing usability and inclusive user experiences.

Full Stack Developer Intern at Tribal Tech, London

NOV 2021 — APR 2023

- Developed interactive React-based admin dashboards using D3.js to visualize operational data and support business reporting.
- Built responsive frontend forms and user interfaces for a customer feedback platform processing over 50,000 reviews.
- Collaborated on debugging, code reviews, and application improvements, contributing to a 20% reduction in reported bugs.

EDUCATION

B.Sc. Computer Science at University of Birmingham, United Kingdom

MAR 2019 — SEPT 2021

SELECTED PROJECTS

Real-Time Analytics Dashboard

- Developed a responsive, real-time analytics dashboard using React and Chart.js, presenting complex engagement and operational data through intuitive, interactive visualizations.
- Built reusable UI components and consistent dashboard interfaces to improve clarity, usability, and maintainability.
- Integrated real-time data updates using WebSockets and backend APIs.
- Implemented role-based access control (RBAC), supporting tailored dashboard experiences for administrators, analysts, and clients.
- Developed export and reporting functionality to improve access to business insights.

E-Commerce Platform Development

- Developed a scalable React-based e-commerce application supporting over 2,000 daily transactions.
- Built responsive customer-facing shopping interfaces and administrative dashboards for inventory, sales, and user management.
- Integrated Stripe and PayPal payment gateways into secure checkout workflows.
- Connected frontend interfaces with backend APIs and authentication services to support reliable user interactions.

Customer Feedback & Sentiment System

- Integrated frontend components with Node.js APIs and backend sentiment-analysis services to deliver processed insights.
- Supported a platform processing 50,000+ reviews and reduced negative-feedback resolution time by 18% through improved triage and visibility.
- Developed React-based feedback forms and interactive admin dashboards, integrating Node.js APIs to present customer reviews and sentiment analysis insights.

Frontend Architecture: Component-Based Architecture, Reusable UI Components, React Hooks, Context API, Redux, State Management, Component Composition, Design System Implementation

Testing & Quality: Jest, React Testing Library, Cypress, Playwright, Unit Testing, Integration Testing, Debugging, Code Reviews

Performance & Accessibility: Web Performance Optimization, Code Splitting, Lazy Loading, Responsive Design, WCAG 2.1 Accessibility

API Integration: REST APIs, GraphQL, WebSockets, Authentication & Authorization

Tools & Workflow: Git, GitHub, CI/CD, Agile/Scrum, Cross-functional Collaboration

Additional Technical Skills: Node.js, Express.js, SQL, MongoDB, AWS, Docker, Firebase
